

A promotional image for Altitude Workwear. Three men are posed against a background of rusty, corrugated metal. One man on the left is wearing a dark blue jumpsuit and is sitting on a wooden pallet, holding a tool. A man in the center is wearing a red jumpsuit and is sitting on a wooden pallet. A man on the right is wearing a blue jumpsuit and an orange hard hat, standing on a wooden pallet. The overall scene is industrial and rugged.

FAQ'S

WHAT DO YOU NEED TO KNOW
ABOUT RAINWEAR?

WHAT DO YOU NEED TO KNOW ABOUT RAINWEAR?

Q Are our Rainsuits and Coats rubberised?

A Yes, they are rubberised.

Q What does a rubberized Rainsuit comprise of?

A A rubberised Rainsuit comprises of PVC and Polyester materials. A rubberised rainwear material is much more durable than a 100% PVC material.

Q What is the difference between Waterproof and Water Resistant?

A A waterproof garment offers the highest level of protection against rain, which means it provides a complete barrier to water.

A water resistant garment can only withstand a certain amount of rain before it will seep into the garment.

Q Does our Rainwear offer heat sealant protection?

A Yes, all seams have been taped and heat sealed which prevents water from seeping in.
